

Going beyond the bounds of safe keeping

Investors of precious metals know that storage is crucial to the protection of their investments. But besides the basic of safekeeping like security, surveillance and insurance, what else can investors expect from a vaulting company to protect their wealth?

Bullion Storage

Security Safe Vault is ISO 9001 certified, 8000 sq feet, state of the art vault which can hold over 600 metric tons of silver and 30 tons of gold and platinum. The stored bullion is segregated and placed in uniquely identified, tamper evident parcel bags (parcels) that can be easily tracked by our clients. This parcel ownership system ensures that our clients are the sole legal owners of their bullion under the Taiwan law.

Safe Deposit Boxes

For clients who desire additional privacy and safety we offer Safe Deposit Boxes (SDBs). All the SDBs come with a set insurance which can be optionally increased if requested. Safe Deposit Box is not considered a financial account by foreign institutions such as IRS in the USA, making it a perfect solution for preserving your wealth.

Testing Lab

We have developed our unique and proprietary non-destructive testing method which measures and compares the different physical characteristics of bullion to ensure that is genuine. We called it the DUX testing which stands for Density, Ultrasound and X-ray – a combination of three tests conducted for to all the bullion that is transferred in by our clients to Security Safe Valut.

Why Taiwan?

Security Safe Vault is set up in Taiwan because we believe it is one of, if not the safest jurisdiction in the world. With its tax free regime for the Investment Grade Precious Metals it is a jurisdiction that is truly safe from the actions of financially distressed governments who, throughout history, have been known to nationalize or confiscate precious metals when faced with a systematic collapse.
